

I am a Member of the Management Board for the IEEE Software and Systems Engineering Standards Committee (S2ESC) <http://standards.computer.org/sesc/>

I serve as advisor the working group chair of several standards including a new emerging standard on Agile Computing.

I am the Working Group Chair of for the family of CASE Tool standards:

IEEE 1175.1 (2002) – IEEE Guide to CASE Tool Interconnections – Classification and Description.

IEEE 1175.2 (2007) – IEEE Recommended Practice for CASE Tool Interconnection – Characterization of Interconnections.

IEEE 1175.3 (2004) – IEEE Guide to CASE Tool Interconnections – Reference Model for Specifying Software Behavior.

IEEE 1175.4 (2008) – IEEE Guide to Case Tool Interconnections – Reference Model for Specifying System Behavior.

IEEE P1175.5 (in progress) – IEEE Guide to Case Tool Interconnections – Reference Data Metamodel for System Behavior Specifications.

I've led my team to successfully completing and getting international approval for 1175.1 ... 1175.4. These can be purchased from IEEE.

I am currently forming a Working Group to tackle 1175.5.
